

Truth

Sadly, today truth is now about how you interpret the facts and what pressures come to bear while you come to the conclusion.

But there was a time when media simply brought forth the facts and let the readers or viewers come to their own conclusions. Audiences established their opinions based on knowledge, experience, and education to make their own decisions.

This time needs to return.

Hopefully, this will be a standard that every Albertan will insist on from their media.

Alberta and Canada needs change.

Our futures depend on it.

*News as it should be.
Unbiased.*

What

The Guardian News is a paper publication containing Conservative black & white current news and information. Fact based journalism, without interference or Special Interest slants or interpretations is necessary to get the full and real story.

We felt the need to fill a perceived hole in accessing unbiased information that is urgent and important for Albertans & Canadians to become informed of. The facts don't lie. But they sure leave many questions.

By supporting our efforts through your purchase of advertising, you will allow us to share information that regular people typically don't access. Information hidden or branded in such a way residents and citizens get caught unaware or in disbelief that the events are occurring.

"Surely our elected officials and top bureaucrats have our best interests at heart."

We will provide the information, our sources, and

ask the important questions.

The primary issues seem to be very straight forward.

- * Transparency
- * Integrity
- * English, not talking points
- * Freedom
- * Morality & Ethics
- * Justice
- * Accountability
- * Right Vs Wrong
- * Less Talk More Action

Distribution

We expect distribution to be on a subscription basis. We will start by hand delivering to senior's housing, coffee shops, and local businesses. Afterwards, all deliveries will be by direct mail.

Initial pressings will start at 1,000 copies and once per month. We anticipate a quick growth because of the appetite for unbiased news. But regardless, by signing up now, your price will not change. Our subscription rates are simply for the first come first served. As we increase distribution, nothing

changes for you except you will know you played a major role in getting our Province, Country, and media back on track.

Contributors

You have to know those who oppose the Conservative point of view will not be happy. Those who are in opposition to a different point of view, who benefit from the continuation of biased media, will be aggressively defending their Special Interest.

The attack on freedom of speech by certain entities, will challenge all of us. There is big money and power on the line for them and they won't be happy to give that up. Or be hindered in their plans.

As a result, all I can say is these are the most informed and dedicated individuals who have taken great personal risk to bring forward the information, facts, and evidence for our readers to help be informed and hopefully bring about change.

To eliminate or mitigate accusations, all evidence, will be posted online with the links as part of the written articles.

But we will not be taking anonymous contributions. Liability is just too high. But for their sake, and the sake of accessing truth and evidence, they shall not be named.

One news item. Printed in the Guardian, posted on multiple online platforms, audio broadcasted, social media distributed, video broadcasted, live events. Albertans will be able to access truth and transparency. And repeat
